

Supra **i**Box

Width: 3.00"

Depth: 2.25"

Height: 7.50"

Weight: 2.25 lbs.

Battery: 2 - 3V Lithium
Maganese Dioxide batteries,
6 year battery life.

Supra iBox

Today, Supra electronic KeyBoxes are used on over 2.3 million homes nationwide. As world technology advances, Supra delivers KeyBox solutions that integrate both old and new technology.

IrDA (InfraRed) communication has been used for many years in TV remote controls. Today this technology has advanced and is now prominent in cellular phones, laptop computers, printers and personal handheld computers. The addition of IrDA to electronic KeyBoxes provides an "open architecture that permits the use of many types of PDA devices." The "point and transmit" function allows agents to securely open KeyBoxes without the key ever touching the box.

Standard features:

- KeyBox shackle code required to open shackle and custom program KeyBox
- Low-battery warning level
- Supports IrDA communication
- Design is smaller, lighter, more stylish
- Stores 3 keys
- Replaceable IR lens

Communication range:

- The communication range will vary from about 3 feet to less than an inch depending on ambient light conditions

Storage capacity:

- Stores the last 100 accesses
- Recorded entries include agent identification and date and time of entry. Electronic flyers, messages and listing agents business cards can be stored in the KeyBox and picked up by listing and/or buyer agents

Key access:

- KeyBoxes are only opened by a valid agent key

Access time restriction:

- Can block up to one restricted access time per day for:
 - Weekdays (Mon-Fri)
 - Saturdays
 - Sundays
